## Methodology

The data in this report was developed from filings at the U.S. Copyright Office and from our own internal estimates. All wireline multichannel video program distributors are required to file basic subscriber information for the systems they own at the U.S. Copyright Office every six months. The cable and telco subscriber numbers in this report are based on figures reported for the period ending June 30, 2012, and include all systems with at least 1,000 subscribers. OTI applied the digital subscriber penetration figures for the top six public cable MSOs and AT&T and Verizon to each company's basic subscriber counts to arrive at digital subscriber counts for their systems. Industry averages were used for all other cable systems. All systems were then aligned with their designated market areas (DMAs). By using the national MVPD penetration figure (88%), OTI estimated the number of DBS subscribers in each DMA to arrive at the final digital subscriber counts in each market.

## **ABOUT ONE TOUCH INTELLIGENCE**

**What we do:** One Touch Intelligence helps companies compete more effectively by producing and delivering critical business knowledge. We combine original monitoring, reporting and analysis with organization and management of your internal and third-party research assets so you can quickly access and distribute vital intelligence.

**Who we serve:** Our clients are leaders in the cable distribution, video content, filmed entertainment, and telecommunications technology sectors. By relying on One Touch Intelligence as an extension of their internal teams, they've elevated corporate knowledge across the enterprise, reduced information management costs, sharpened the decision-making process, and saved time.

The intelligence you need is just One Touch away. Visit us at [www.onetouchintelligence.com](http://www.onetouchintelligence.com).
